ABOUT US

星林源

广东星林家具有限公司创建于家具盛世之期，专业致力于办公家具、医疗家具、养老家具的开发、设计、生产。公司率先通过ISO9001质量管理体系认证和ISO14001环境管理体系认证及职业健康安全管理体系认证，从而获得了中环联合（北京）认证中心有限公司颁发的“中国环境标志产品认证证书（十环认证）”等。

现在广东星林家具有限公司拥有生产车间1万多平方米，配有德国、台湾等国家与地区进口及国内优秀厂家专业生产设备，采用流水线管理方式进行生产，保证了品质的恒定。

公司每一件产品的生产都有依符合人体工程学的特点为生产理念，以设计的整体与力感为先，以货真价实的原材料为基础，精工制造，层层质检加之极具竞争的营销方案与营销网络、优质周到的售后服务形成独有的体系，作为一个办公家具的制造者我们全力为客户提供周到细致、高效的服务并配以“量身订制”服务，向客户提供优质产品，取得客户的信任与支持。

Guangdong Xinglin Furniture Co., Ltd. was established in the prosperous period of furniture, specializing in the development, design and production of office furniture, medical furniture and senior furniture. The company took the lead in passing the ISO9001 quality management system certification, ISO14001 environmental management system certification and occupational health and safety management system certification, thus obtaining the "China Environmental Labeling Product Certification (Ten Ring Certification)" issued by Central United (Beijing) Certification Center Co. Wait.

At present, Guangdong Xinglin Furniture Co., Ltd. has a production workshop of more than 10,000 square meters, equipped with professional production equipment imported from Germany, Taiwan and other countries and regions and domestic excellent manufacturers. It adopts the production line management method for production, ensuring the constant quality.

The production of each product of the company has a production concept based on ergonomic characteristics, based on the overall design and strength of the design, based on genuine raw materials, precision manufacturing, layered quality inspection and highly competitive marketing. The plan and the marketing network and high-quality and thoughtful after-sales service form a unique system. As a manufacturer of office furniture, we are fully committed to providing customers with thoughtful and efficient services and coupled with "tailor-made" services to provide customers with quality products. To gain customer trust and support.

导诊台: XLMT-DZT01 规格: 8000*6000*1100

功能设计

- 1 电脑键盘抽
- 2 资料存储柜
- 3 资料存储格
- 4 轮椅服务站

走线设计

服务站前挡板加厚复合材料, 采用三明治结构, 上下两层为装饰面板, 中间层为木制骨架, 电源及网格种线路均可从中间骨架中穿过, 预留走线槽。

模块化设计

产品为工厂车间标准化生产, 而非现场手工制作, 所以我们采用模块化生产, 对产品的每个功能部件及组合部件进行了合理性的细分, 在工厂加工好相应的预制部件, 然后在使用场景中安装, 由于采用工厂车间标准化生产可以保证产品质量及生产加工进度。

导诊台: XLMT-DZT02 规格: 4000*4000*1100

导诊台: XLMT-DZT03 规格: 6800*1800*1100

简约风格化导诊台，简单而不失大气与庄重。台面采用人造石材无缝拼接，踢脚线采用拉丝不锈钢材质，柜台前采用木制装饰面板。柜台前挡板采用三明治结构，表面两层采用装饰面板，中间采用木制骨架，中间预留走线槽。

The simple and stylized consultation table is simple yet elegant and solemn. The countertop is made of artificial stone for seamless splicing, the skirting line is made of brushed stainless steel, and the front of the counter is made of wooden decorative panel. The front baffle of the counter adopts a sandwich structure, and the two layers of the surface adopt decorative panels, the middle adopts a wooden frame, and the middle is reserved for wiring grooves.

MEDICAL TREATMENT FURNITURE

导诊台: XLMT-DZT04

规格: 8000*2500*1100

丝带设计思路, 整体外观流线行, 前档采用色块装饰。踢脚线采用拉丝不锈钢材质, 柜台前采用木制装饰面板。柜台前档板采用三明治结构, 表面两层采用装饰面板, 中间采用木制骨架, 中间预留走线槽。
Ribbon design ideas, the overall appearance is streamlined, and the front gear is decorated with color blocks. The skirting is made of brushed stainless steel, and the front of the counter is made of wooden decorative panels. The front baffle of the counter adopts a sandwich structure, and the two layers of the surface adopt decorative panels, the middle adopts a wooden frame, and the middle is reserved for wiring grooves.

护士站设计主要是为病人考虑,一方面从心理上给予病人舒缓病痛的反应,二者可以让患者积极应对病情所带来的负面影响。因此必须遵循的原则有以下三点:

- 1、合理的护理半径,方便照顾各间病房。
- 2、视线通达,方便观察护理单元内各病房活动情况。
- 3、通风采光良好。

The design of the nurse station is mainly for the consideration of the patient. On the one hand, the patient is given a psychological response to relieve the pain. The two can allow the patient to actively cope with the negative effects of the condition. Therefore, the following principles must be followed:

1. Reasonable nursing radius, easy to take care of each ward.
2. The line of sight is accessible to facilitate the observation of the activities of each ward in the nursing unit.
3. Good ventilation and lighting.

GUIDE RECEPTION

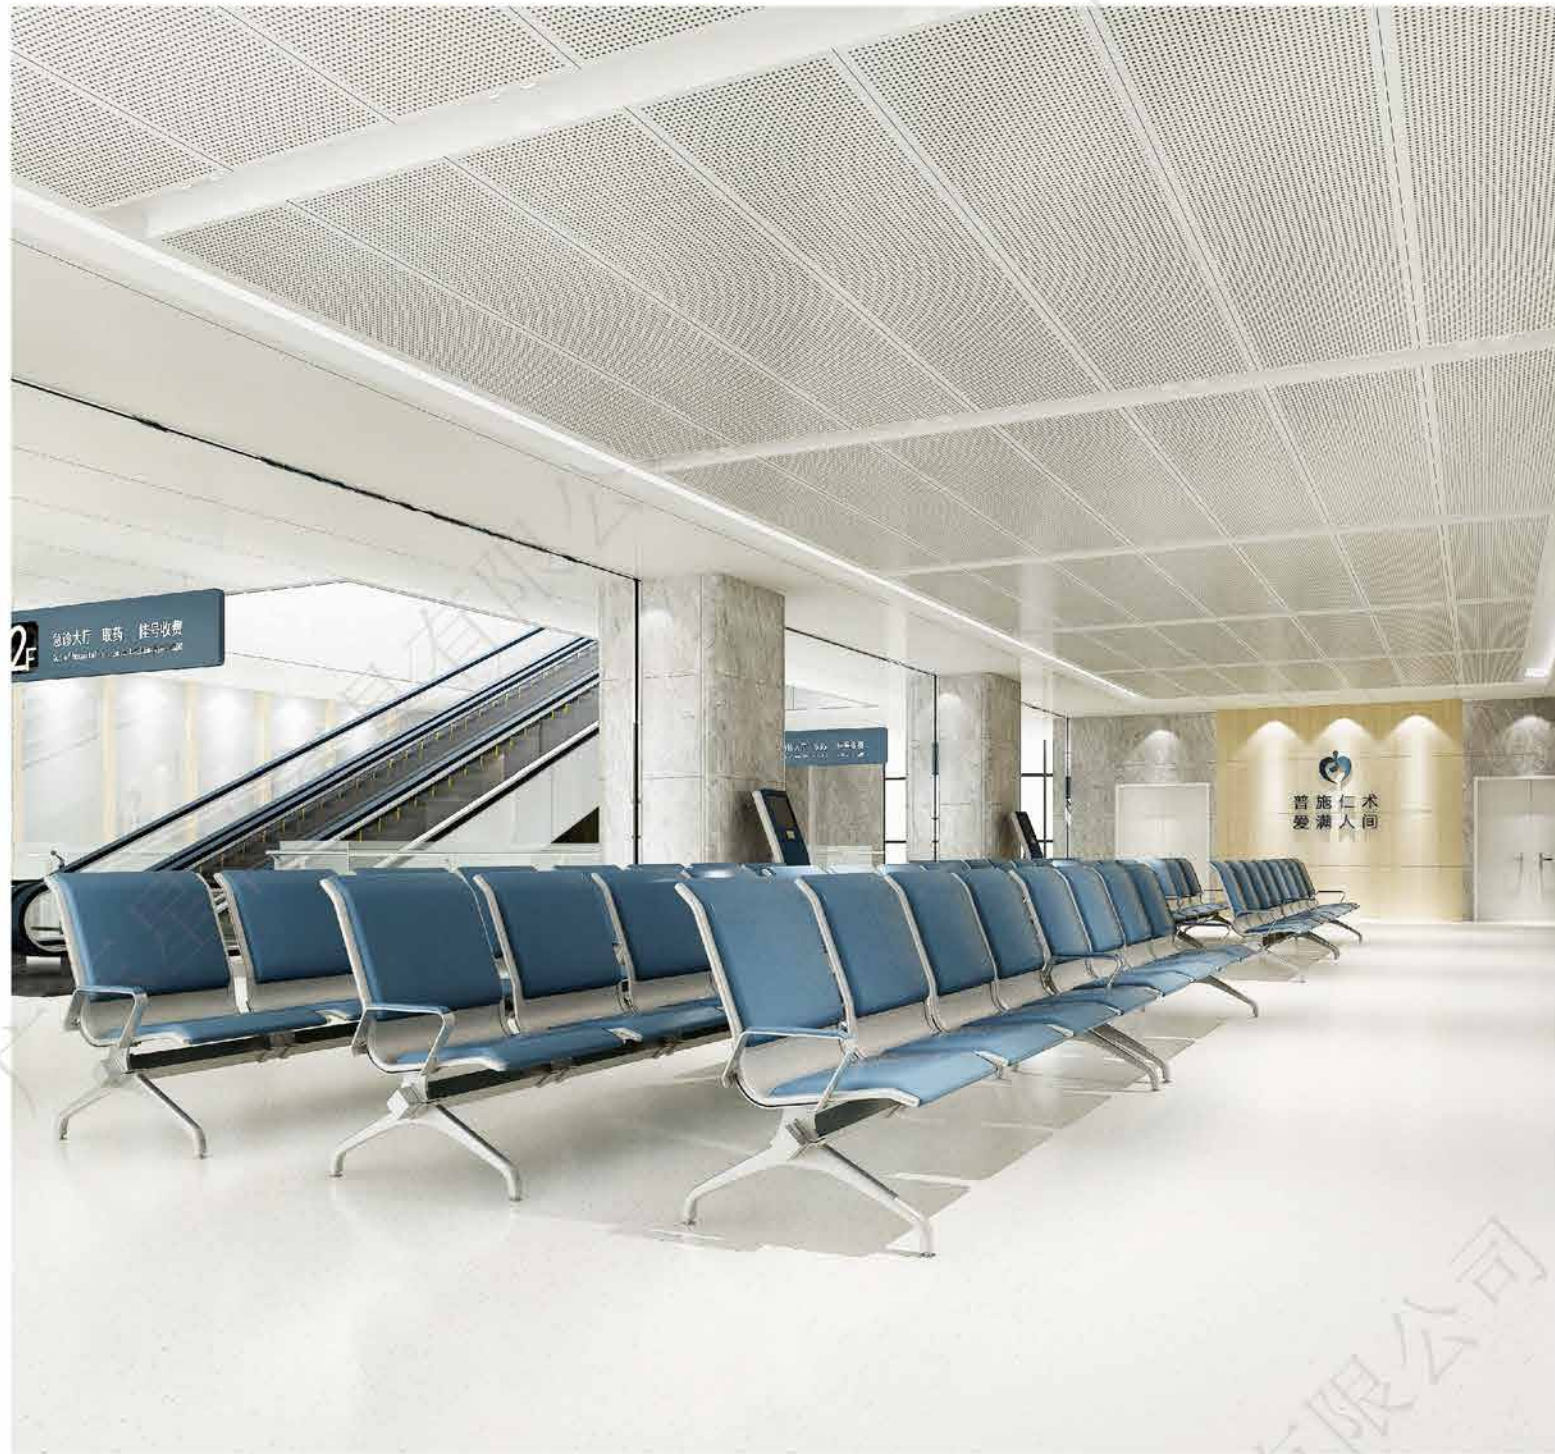

导诊台

导诊台: XLMT-DZT09 规格: 7000*2000*1100

现代感强对较强,250毫米高的不锈钢踢脚,给人一种现代简洁感。产品整体立体感强。
The modern sense is stronger than the strong one. The 250mm high stainless steel kicks give a modern sense of simplicity. The overall three-dimensional sense of the product is strong.

从仅作为“等待”的空间转为舒适惬意的空间。可以轻松治愈患者的心理和身体的温馨空间,使我们首要考虑的理想候诊空间。

在长期对患者进行抽样调查后发现,针对病人对医院的所有不满现象,其中“患者在候诊区等待时间过长”这种不满,排在了第一位。可以温馨地治愈患者的心理和身体的空间环境,是我们考虑理想的候诊空间的首选方案。

The waiting area changes from space only for waiting to comfortable and warm place. It can easily cure patients' physical and psychological diseases and is our first-choice waiting space.

In the long-term investigation of patients, for all patients of discontent to the hospital, the patients in the waiting area waiting for a longtime" this dissatisfaction, in the first row. The space environment can be the patient's psychological and physical warm cure, is the preferred scheme we consider the ideal waiting space.

护士站: XLMT-HSZ01 规格: 6000*6000*1100

护士站, 称护士工作台, 又称护士导诊台或导诊台。英文为“Nursing station”。护士站就是大家进入医院门诊大门后最先看见的前台, 代表着医院或者医疗机构的形象。护士站是CIS的重要组成部分之一, 是医生与病患的纽带。护士站它协助护士完成日常的护理工作, 并方便处理核对医生下达的医嘱。

简洁、安全、舒适是设计护士站的宗旨, 方便患者咨询, 让患者感到踏实, 温暖。从心理上舒缓病人的病痛, 积极面对病痛带来的负面影响。

The nurse station is called the nurse's workbench, and is also called the nurse's guiding table or guiding table. English is "Nursing station". The nurse station is the first reception desk that everyone sees after entering the hospital outpatient clinic door, representing the image of a hospital or medical institution. The nurse station is one of the important components of CIS, and it is the pivotal link between doctors and patients. The nurse station assists nurses to complete their daily nursing work and facilitates the handling of medical orders issued by doctors.

Simplicity, safety, and comfort are the tenets of the design nurse station, which facilitates patient consultation and makes patients feel down-to-earth and warm. Psychologically relieve the patient's pain, and actively face the negative effects of the pain.

护士站: XLMT-HSZ03 规格: 8000*700*1100

MEDICAL TREATMENT FURNITURE

护士站: XLMT-HSZ04

规格: 7000*700*1100

护士站是护理的作业基地,是整个病房的“交通枢纽”,也是接待患者和探视人员的重要窗口,承担着护理单元的重要人物。因此,在设计上不只要有利用空间满足功能需求,同时应添加视觉美感。

1.功能:病房护理站主要功能包含招待咨询,入院登记,书写及存放病历,信息录入,处理医嘱,接纳患者呼叫信号,会集监护等。

2.方位:护理站可设在护理单元中心方位,宜通视护理单元走廊。优点是护理单元的护理半径合理,医护人员能够便利、快速的到达各个房间,便利对病人的护理。《综合医院修建设计规范》中要求护理站到最远病房门口的距离不宜超过30m。

The nurse station is the base of nursing operations, the “transportation hub” of the entire ward, and an important window for receiving patients and visitors, and it is an important person in the nursing unit. Therefore, in the design, not only need to use the space to meet the functional requirements, but also add visual beauty.

1. Functions: The main functions of the ward nursing station include hospitality consultation, admission registration, writing and storage of medical records, information entry, processing doctor orders, receiving patient call signals, gathering monitoring, etc.

2. Direction: The nursing station can be located in the center of the nursing unit, and the corridor of the nursing unit should be viewed. The advantage is that the nursing radius of the nursing unit is reasonable, and the medical staff can easily and quickly reach each room to facilitate the nursing of the patient. The “Code for Construction Design of General Hospitals” requires that the distance between the nursing station and the door of the furthest ward should not exceed 30m.

护士站: XLMT-HSZ07 规格: 7000*1600*1100

护士站设计主要是为病人考虑,一方面从心理上给予病人舒缓病痛的反应,二者可以让患者积极应对病情所带来负面影响。因此必须遵循的原则有以下三点:

- 1、合理的护理半径,方便照顾各病房。
- 2、视线通达,方便观察护理单元内各病房活动情况。
- 3、通风采光良好。

除此之外,在护士站里,应充分考虑到医疗设备的安放位置和物品的摆放,同时还应考虑此区域的相对隐私和美观。给护士站留出储藏设备安置的位置;增加了护士站的储物空间,同时也减少占地,增加了护士站的工作面积特点。

The design of the nurse station is mainly for the consideration of the patient. On the one hand, the patient is given a psychological response to relieve the pain. The two can allow the patient to actively cope with the negative effects of the disease. Therefore, the following principles must be followed:

1. Reasonable nursing radius, convenient to take care of each ward.
2. The line of sight is accessible to facilitate the observation of the activities of each ward in the nursing unit.
3. Good ventilation and lighting.

In addition, in the nurse station, the placement of medical equipment and the placement of items should be fully considered, and the relative privacy and beauty of this area should also be considered. Leave a place for the storage of storage equipment for the nurse station; increase the storage space of the nurse station, while also reducing the footprint and increasing the working area characteristics of the nurse station.

不同于日常的生活,患者会因自身的病状,身体的痛苦、不自由等因素而产生各种各样的不安和压力。患者需要的是一个白天能舒适的度过,晚上能有好心情的睡个安稳觉的生活空间,这样可以促进患者早点恢复健康。打造一个既能带给患者舒适愉快的疗养生活,又能很好地关注患者精神面貌的高质量的疗养空间。同时,能让治疗、看护都高效的进行,便于医护人员工作。

Different from daily life, patients suffer from various anxieties and stresses due to their own medical conditions, physical pain, and insecurity. What the patient needs is a living space that can be spent comfortably during the day and a good night's sleep, which can promote the patient's early recovery. Create a high-quality recuperation space that can bring patients a comfortable and pleasant life of recuperation, and can pay close attention to the mental appearance of patients. At the same time, the treatment and care can be carried out efficiently, which is convenient for the medical staff.

简约并不等于简单，在办公室装修设计，不是简简单单的堆砌和无辜平淡的摆放，现代办公室的简约不只是说装修设计，相反应当就生活所需来买，而且要以不占面积，多功能，实用等方面考虑。其实，有些装修的“风格”是完全没有必要的，而且要的越多，带来的“隐患”也就随之越多。

Simplicity does not mean simplicity. In office decoration design, it is not simple stacking and innocent display. The simplicity of a modern office is not just about decoration design. On the contrary, it should be bought for the needs of life, and it should not occupy an area. Multi-functional, practical and other considerations. In fact, some “styles” of decoration are completely unnecessary, and the more you want, the more “hidden dangers” it will bring.

HEAD NURSE/DIRECTOR'S OFFICE

护士长/主任办公室

现代医用办公室设计，利用自然采光，多使用流畅简约的线条和造型，通过光影的轮、明暗层次效果，在一定的空间内创造出新颖和时尚之感。造型简洁，材料注重工艺变化、光泽、精巧造型，对心灵产生一种明朗，而且有序秩序的质感。独具新意，这种风格很普遍，也很受欢迎这种设计也需要综合多个因素，具体情况进行分析，才能抓住客户需求，实现办公空间的装修效果。比如个人和集体的功能空间规划、整体的形象设计、办公环境对人的心理满足洞察分析等，才能达到超出对方的期待效果。

The modern medical office design uses natural lighting, mostly smooth and simple lines and shapes, and creates a sense of novelty and fashion in a certain space through the circle of light and shadow, and the effect of light and dark. The shape is simple, and the materials focus on technological changes, luster, and exquisite modeling, which create a clear and orderly texture to the soul. Unique and innovative, this style is very common and popular. This design also needs to integrate multiple factors and analyze the specific conditions in order to capture customer needs and achieve the decoration effect of the office space. For example, individual and collective functional space planning, overall image design, insight analysis of the psychological satisfaction of the office environment, etc., can achieve the effect that exceeds the expectations of the other party.

开放式办公空间设计有利于人与人之间互动，工作彼此间的协作，医生办公室人员不同于其它工作的人员，往往医生办公室人员是身兼多职，每天只有一部份时间在办公室，所以办公空间相对来说不会太大，但大部份人还要配置办公桌，还有医生办公室相对其它医院空间来说，医院办公室面积很小，所以内部设计往往是根据房间面积定制，以达到充分利用空间。

The design of the open office space is conducive to the interaction between people and the cooperation between the work. The doctor's office staff is different from other staff. The doctor's office staff is often multi-tasking, and only part of the day is in the office. The office space is not too big, but most people also need to configure a desk, and the doctor's office is relatively small compared to other hospital spaces. The hospital office area is very small, so the interior design is often customized according to the room area. Achieve full use of space.

MEDICAL TREATMENT FURNITURE

1、现代前卫风格：追求无常规的空间结构，依靠好材料、新技术加上光与影的无穷变化，大胆鲜明对比强烈的色彩布置，以及刚柔并济的选材搭配。

2、现代简约风格：现代简约风格讲求功能至上，形式服从功能。所以在设计时吊顶、主题墙等占用空间，没有太多实用价值的造型都能省则省。特点是简洁明快、实用大方。因为“极简主义”的生活哲学普遍存在于当今大众流行文化中。

1. Modern avant-garde style: Pursuit of unconventional space structure, relying on good materials, new technologies and endless changes of light and shadow, bold and contrasting color layout, and selection of materials that are both rigid and soft.

2. Modern minimalist style: Modern minimalist style emphasizes function first, and form follows function. Therefore, when designing, ceilings, theme walls, etc. that occupy space and do not have much practical value can be saved. The characteristic is simple and clear, practical and generous. Because the life philosophy of "minimalism" generally exists in today's popular culture.

CONSULTING ROOM

会诊室

会诊室装修颜色搭配要完善多媒体会议室在设计的过程中，颜色的搭配和空间的合理使用一定要引起重视，使用的颜色要简单和大气，选择的家具也要符合整个空间的装饰风格 and 效果，像形体比较纤细的家具使用是不错的选择，这样能够使这个空间产生更多的先进化的气氛，多媒体会诊室的背面要正对着大范围的办公区域，所以盒子的背面设计一定要具有立体的效果存在，还要有钢化玻璃的使用，这样空间的灵动性也是比较充分的，产生趣味就比较浓厚。

Consultation room decoration color matching should be perfect in the design process of multimedia conference room, color matching and rational use of space must pay attention to, the color used should be simple and atmospheric, and the choice of furniture should also meet the decoration style and effect of the entire space. It is a good choice to use slender furniture like this, so that this space can produce a more advanced atmosphere. The back of the multimedia consultation room should face the large office area, so the back design of the box must have the three-dimensional effect exists, and the use of tempered glass is also required, so that the flexibility of the space is also sufficient, and the interest is relatively strong.

医院值班室是护士及医生晚上休息的地方，护士及医生上班往往是轮流值制度，一般上晚上班时经常在值班时休息一到二个小时以补充体力，一般值班室空间不大，但需要几个基本的功能，休息要有床，有时候可能要在值班室作一下文字方面工作，也有学习方面的需求，所以常用的值班室经常配有床、床头柜、书柜、衣柜等。其中床根据空间大小可以采用双层床或单人床等。床的根据材质大部份采用钢制、木质、板式这三种。

The hospital duty room is a place where nurses and doctors rest at night. Nurses and doctors often work on a rotating duty system. Generally, they often take one to two hours of rest during night hours to supplement their physical strength. Generally, the duty room has little space, but it needs There are several basic functions. You must have a bed for rest. Sometimes you may have to do some text work in the duty room. There are also learning needs. Therefore, the commonly used duty room is often equipped with beds, bedside tables, bookcases, wardrobes, etc. The beds can be bunk beds or single beds according to the space size. The bed is mostly made of steel, wood and plate according to the material.

模块化设计

所有柜体采用模块化设计，工厂根据客户现场进行丈量，进行功能化设计，把复杂的功能需求分成不同的功能模块单元，根据模块单元进行生产，现场根据单元分布进行安装。这样有利于工业化生产及产品质量的管理。
All cabinets adopt modular design. The factory performs measurement according to the customer's site and performs functional design. The complex functional requirements are divided into different functional module units, and production is performed according to the module unit. Installation is performed on site according to the unit distribution. This is conducive to industrial production and product quality management.

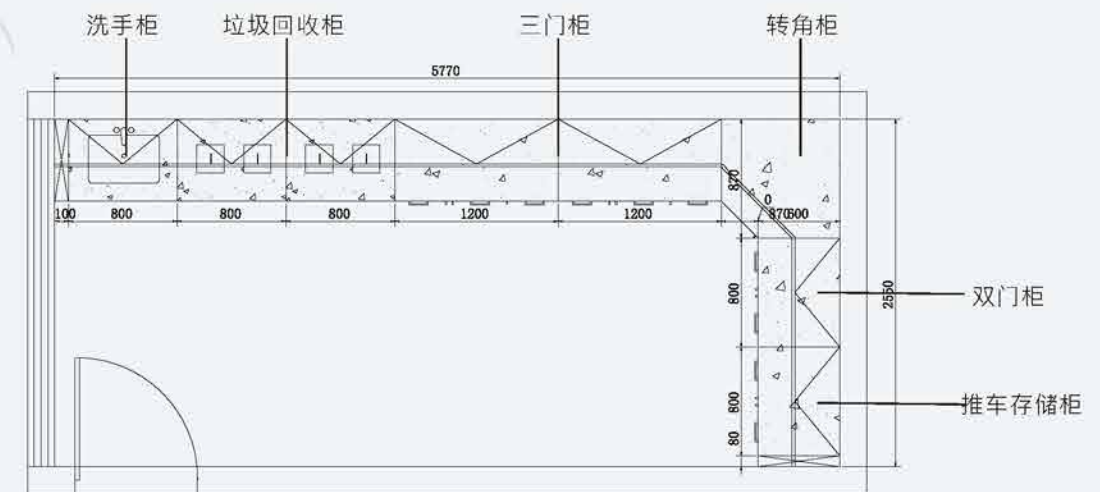

MEDICAL TREATMENT FURNITURE

伴随着治疗环境的变化,准确迅速的物品供给、回收方式已经被认为是理所当然的要求。为了对应这个环境变化,推荐物品的配套原件,也是一种解决方法。器械的集装箱化,药品的配套化的进展,各种物品、药品分类放置,位置固定、标签完整、自己清楚等条件,已成为治疗室的普通要求。With the change of treatment environment, accurate and rapid supplies and recycling methods have been taken for granted. In order to cope with this environmental change, it is also a solution to recommend matching original articles. Containerization of instruments, progress of matching drugs, classification and placement of various articles and drugs, fixed position, complete label and self-clarity have become common requirements of treatment rooms.

诊室专门为年龄较小的儿童设计，医生在就诊儿童时候乱动，在家长的陪伴下，将儿童放在桌上就诊，诊桌设计了专门为儿童可以坐的区域，采用软垫座垫一体成型。产品颜色也采用儿童喜爱的颜色。

The consultation room is specially designed for younger children. The doctor makes disturbances when visiting the child. With the parent's company, the child is placed on the table for treatment. The table is designed for children to sit in. The software seat cushion is integrated. The color of the product is also adopted by children.

INFANT WASHING AREA 洗婴中心

无论是空间还是家具产品,都可以让家属有效的观察儿童洗浴时的反应情况。活泼新颖,亲切优雅的环境设计,自主研发的软胶洗婴盆,自动恒温、混水系统,都体现了医疗家具对新生儿无微不至的关怀。
Whether space or furniture products, family members can effectively observe the reaction of children in the bath. The lively, novel, friendly and elegant environment design, self-developed soft rubber baby wash basin, automatic constant temperature and water mixing system all reflect the meticulous care of medical furniture for newborns.

后勤中心 LOGISTICS CENTER

SUPPLY CENTER FOR STERILIZED OBJECTS/消毒供应中心
MEDICAL CART/医用推车

随着社会的发展,现代医疗水平的不断提高,作为医院内重点科室的消毒供应中心所从事的消毒灭菌工作是控制医院内感染、保证医疗护理质量的重要环节,在感染控制中起着不可低估的重要作用。它已日益受到卫生部门各级领导的广泛关注,为此各地制定了相关的审核验收标准,以促进消毒供应中心的持续改进。

With the development of society and the improvement of modern medical level, the disinfection and sterilization work of the disinfection and supply center, as a key department of hospital, is an important link to control hospital infection and ensure the quality of medical care. It plays an important role in infection control. It has attracted more and more attention from leaders at all levels of health departments. For this reason, relevant acceptance criteria have been formulated to promote the continuous improvement of disinfection supply centers.

MEDICAL TREATMENT FURNITURE

人体工程学设计

3种规格，高度可适应不同人群，推起来轻松自如，常用配件放手边，减少弯腰及转身。

创新挂具系统

可根据使用需求，任意增减配件挂具；及配件平移、配件上下移动。

创新隔板

自由分区隔板由聚碳酸酯（简称PC）材质所制成。任意调整隔断大小，方便分类分区存储。

药品安全

一次性锁、中控锁、电子锁保障药品安全。
