## | 大数据体验中心

养老产业规划展示区——主要通过文字图片静态或视频动态的方式展示及介绍养老产业的发展历程，通过历程及相关政策，描绘养老产业未来发展前景。每个地区根据自身区域经济、地理、工业等社会环境结合目前发展状况来制定相应的产业发展规划。  
BIG DATA EXPERIENCE CENTER mainly displays and introduces the development process of the elder care industry through text pictures or video dynamics, and describes the future development prospects of the elder care industry through the course and related policies. Each region formulates a corresponding industrial development plan according to its own regional economy, geographic, industrial and other social environment in combination with the current development status.

### 养老产业展示厅

养老产业展厅——是指关于养老产业的规划及目前状况，展示墙面为地区养老产业总体概况，总体概况主要包含以下几个方面介绍：

- 一、关于国家政策方面介绍，随着中国逐步迈入老龄社会，养老是国家总体规划发展方向，在国家总体规划下，地方政府也有相应的政策介绍。
- 二、目前本地区养老产业配套情况，建立相应的产业配套群。产业配套群建立不是那么容易，产业链上下游养老相关企业概况。
- 三、本地区的养老市场及地产业介绍。养老产业包括生产端，同时也有消费端，包括硬件资源，也要有相应的软件配套，养老产业包括老年生活的各方面，设备、家具、医药、食品、服务等。

Elderly care furniture exhibition hall refers to the planning and current status of the elderly care industry. The display wall is a general overview of the regional elderly care industry. The general overview mainly includes the following aspects:  
 1. Introduction to national policies. As China gradually enters an aging society, old age is the development direction of the overall national plan. Under the overall national policy plan, local governments have also introduced corresponding policies.  
 2. The current supporting conditions of the elderly care industry in the region and the establishment of corresponding supporting groups. The establishment of industrial supporting groups is not so easy, and the general situation of pension-related enterprises in the upstream and downstream of the industrial chain.  
 3. Introduction of the elderly care market and real estate industry in the region. The elderly care industry includes the production side, as well as the consumer side, including hardware resources, and corresponding software support. The elderly care industry includes all aspects of elderly life, including equipment, furniture, medicine, food, and services.

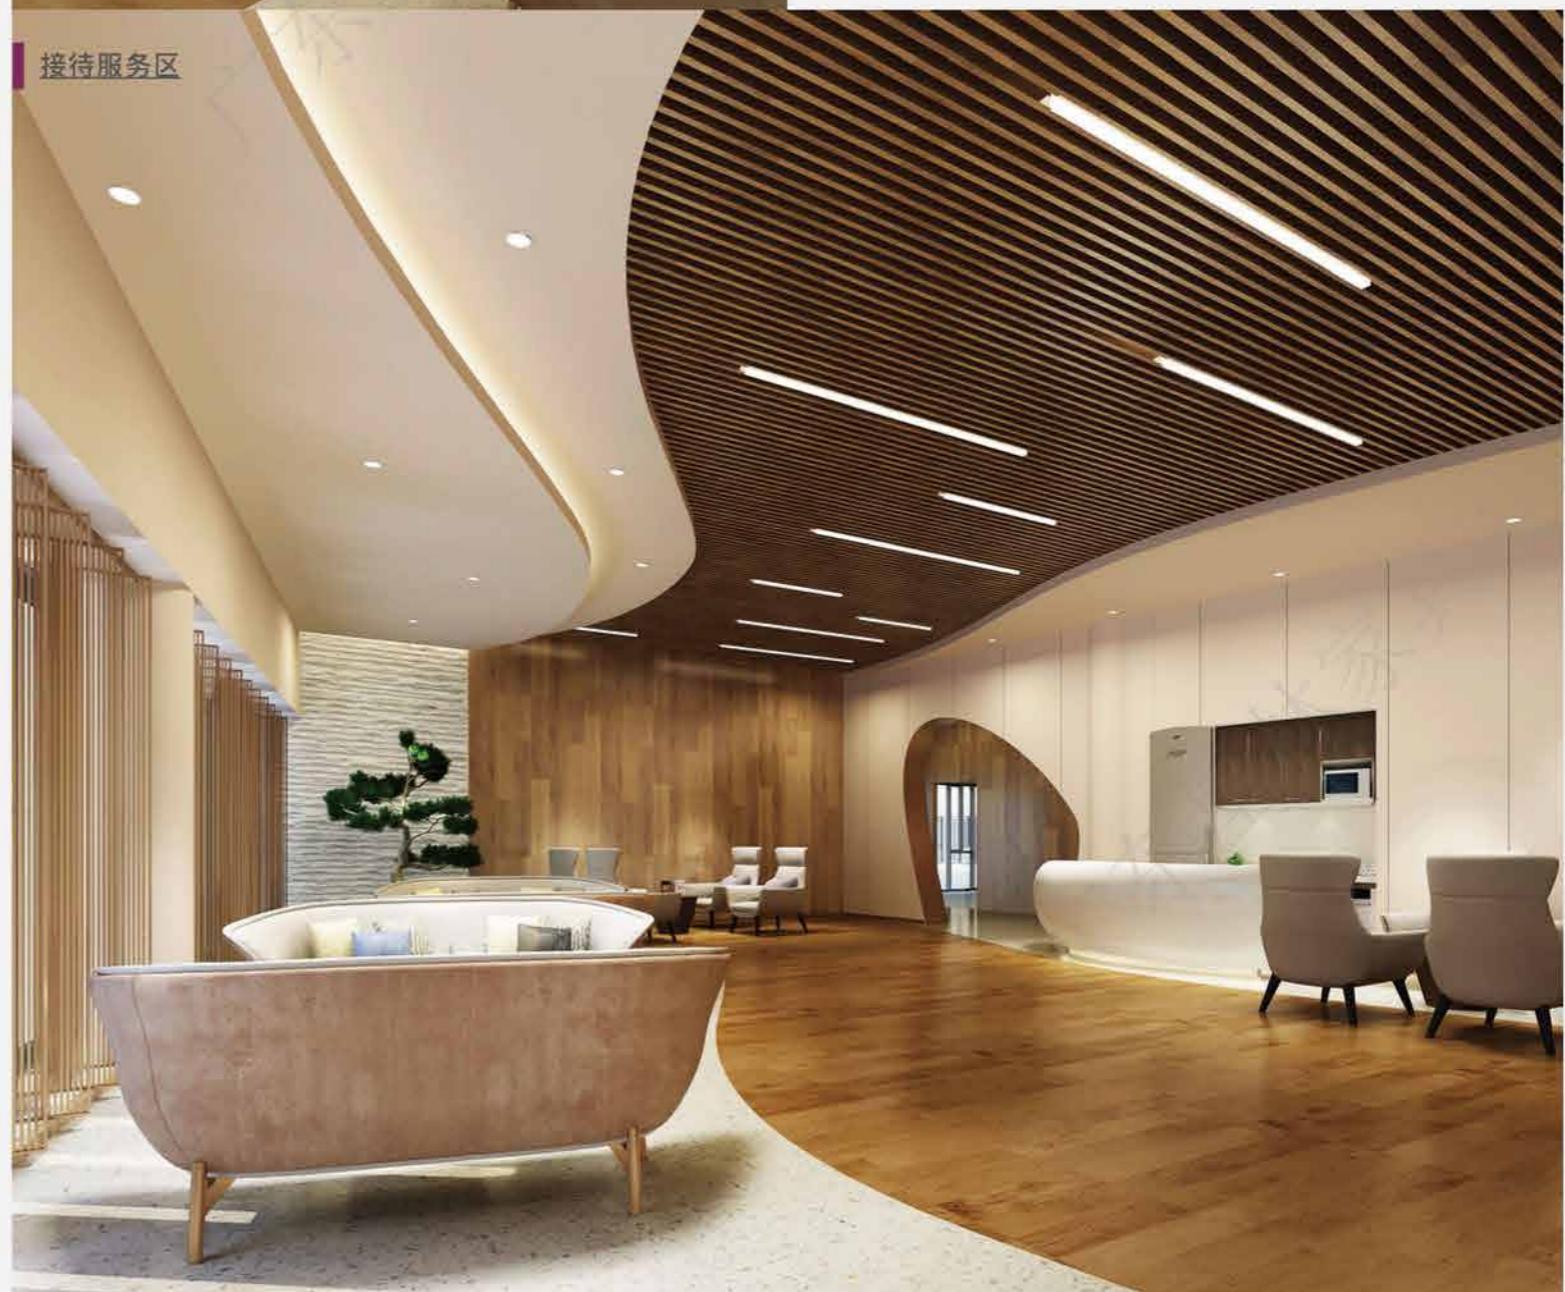

### 接待服务区

接待服务区——为来参观的人提供相应的接待工作，提供相应接待工作，空间包括参观客户休闲区，洽谈区，包括洽谈沙发位，休闲区，相应的宣传资料展示架等。

整体设计符合养老合格，体现了现代但不是简单的那种，设计由大量的曲线构成，由天然木制及白色相互呼应，充满着温馨感。服务台由不规则曲线外观，白色大理石材质，内部放置相应茶水及冷藏设备，地面由地板及防滑地塑板组成。由曲线划分，与顶面相呼应，都由天然原木颜色与白色组成，涉及相应的家具都采用人体工程学曲线设计。

Reception service area——Provide corresponding reception work for visitors, and provide corresponding reception work. The space includes visiting customer leisure areas, negotiation areas, including negotiation sofa seats, leisure areas, and corresponding promotional material display shelves.

The overall design meets the eligibility criteria for the elderly, reflecting the modern but not simple one. The design consists of a large number of curves, which are echoed by natural wood and white. It is full of warmth. The desk is made of irregular curved appearance, white marble material, and the interior places the corresponding tea and refrigerating equipment. The floor is composed of floors and non-slip plastic panels. It is divided by curves and echoes the top surface. It is composed of natural log colors and white. Seats and corresponding furniture are designed with ergonomic curves.

## 养老家具展示区

养老家具大体结构与常用家具相同。不过也有一些不同，主要在细节和设计方面更加符合老年人的生理特征，比如老年人喜欢原木，所以大部份以原木色为主，很少采用冷色调材料，在家具的转角都有圆角化处理，为了防止老人滑倒产生碰撞带来的伤害。在家具细节方面多处设计了扶手，让老年人好抓手。床带侧边带有扶手，利于老年人起身，床尾带有扶手，方便老年人走路可以扶手。天然原木为主的材质，加上少量的白色软包。

The general structure of old-age furniture is the same as that of common furniture, but there are some differences, mainly in terms of details and design. It is more in line with the physiological characteristics of the elderly. The corners of the furniture are rounded in order to prevent the elderly from slipping and causing injuries. Handguards have been designed in many places in the furniture details to make it easier for the elderly. The side of the bed belt has armrests, which is convenient for the elderly to get up, and there is an armrest at the end of the bed. Natural log-based material, plus a small amount of white soft bag.

## 专业老年护理设备展示区

老年护理设备展示区——主要展示老年护理设备，包含专业护理床，轮椅，助行椅，相应的检测及康复设备。养老服务设备主要指养老院入院进行老年人身体的检测来判断老年护理等级。老年康复设备包括多方面，老年人身体生理机能随着年龄增长不方便，老年人身体健康最为重要，康复设备主要是让老年人提高生理身体机能。

Elderly care equipment display area—mainly displays elderly care equipment, including professional nursing beds, wheelchairs, walking chairs, corresponding testing and rehabilitation equipment. Elderly care testing equipment mainly refers to the nursing home's physical examination to determine the level of elderly care. Rehabilitation equipment for the elderly includes many aspects. The physical function of the elderly is inconvenient with age. The physical health of the elderly is the most important. The rehabilitation equipment is mainly to improve the physical function of the elderly.

## BRITISH STYLE/英伦风情

英伦风情——整体设计吸取了欧式建筑风格，这种风格采用罗马雕刻柱及花纹线条来体现美学。英式皇家风格，体现了产品特殊品味、文化、内涵都在本系列产品得以彰显。

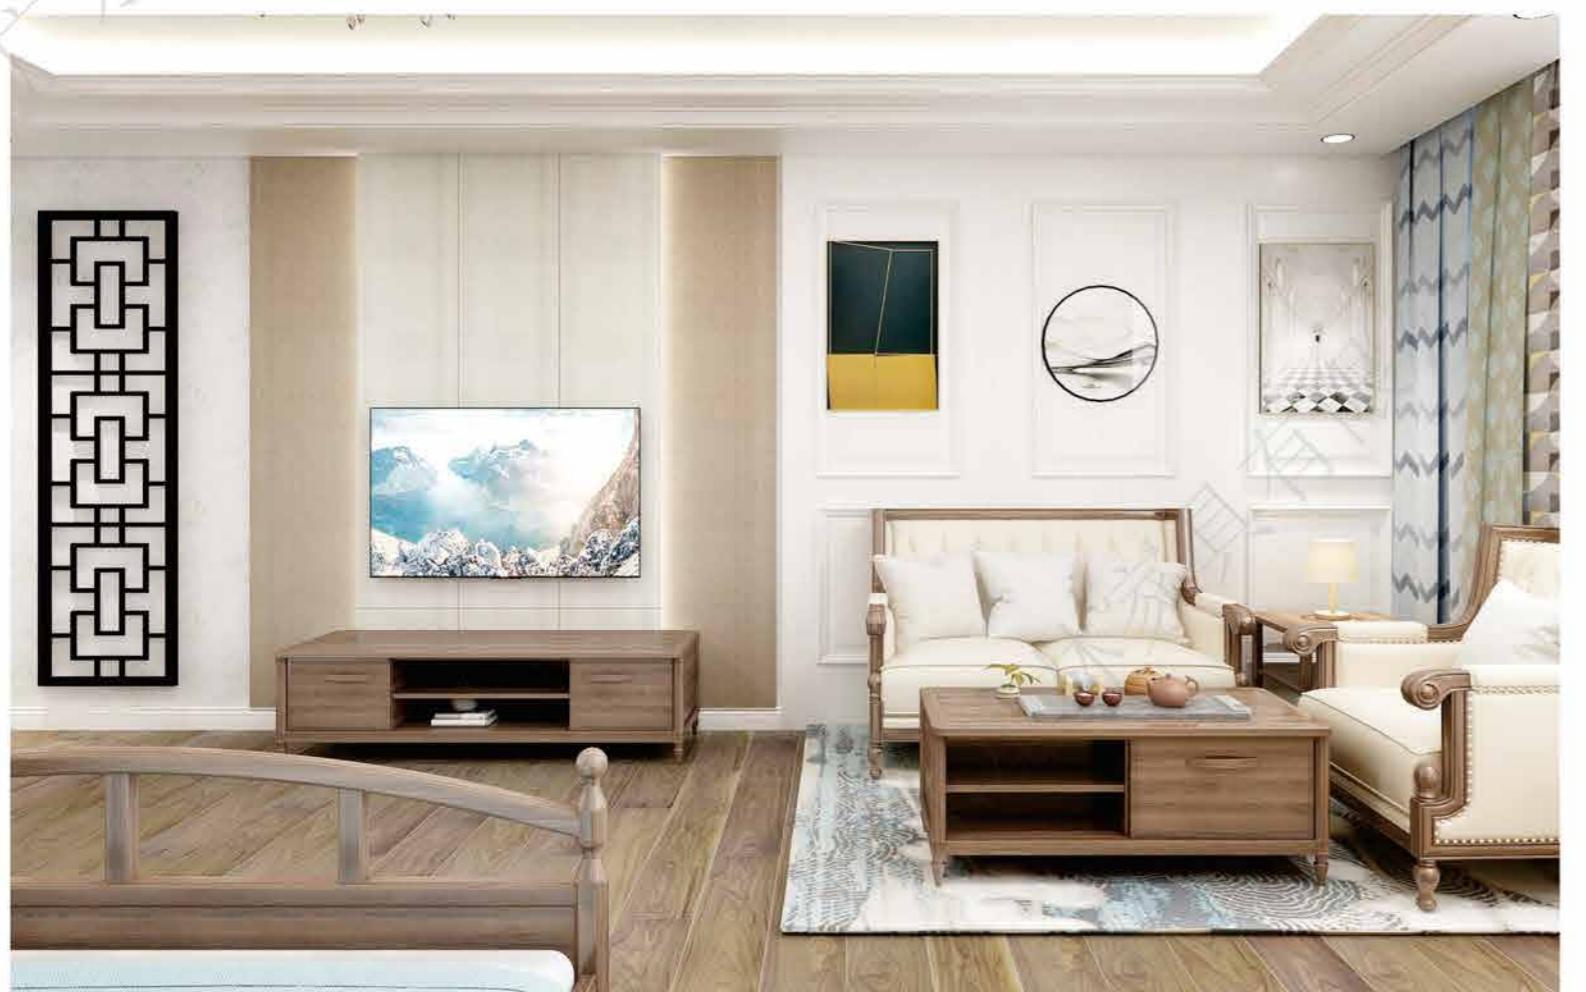

本系列家具产品采用英式罗马柱建筑雕刻工艺，精雕细琢，虽不是过于复杂，但更好的贴切了老年人，让人第一眼看去即体现品味与文化，同时又不过去繁杂。

采用天然原木制作，在家具设计中多处增加了老年人特征的设计要点：比如增加了多个抓手扶栏，在罗马柱顶部设计成圆球状，也是为了更好的抓手。

British style—the overall design draws on European architectural style, this style uses Roman carved columns and pattern lines to reflect aesthetics. The British royal style reflects the special taste of the product, and the culture and connotation are reflected in this series of products.

This series of furniture products adopts the British Roman column architectural carving technology, which is carefully carved. Although it is not too complicated, it is more relevant to the elderly, which allows people to reflect taste and culture at first glance, but not to be complicated in the past.

Made of natural logs, the design features of the elderly are added in many places in the furniture design, such as copper metal.

在整体空间规划方面，对家具的室内空间和动线进行科学规划和设计，合理规划各功能区，保证每个空间的采光和通风性；预留大尺度空间，方便轮椅等的进出，让老人无障碍通行，行动更加便捷自如。

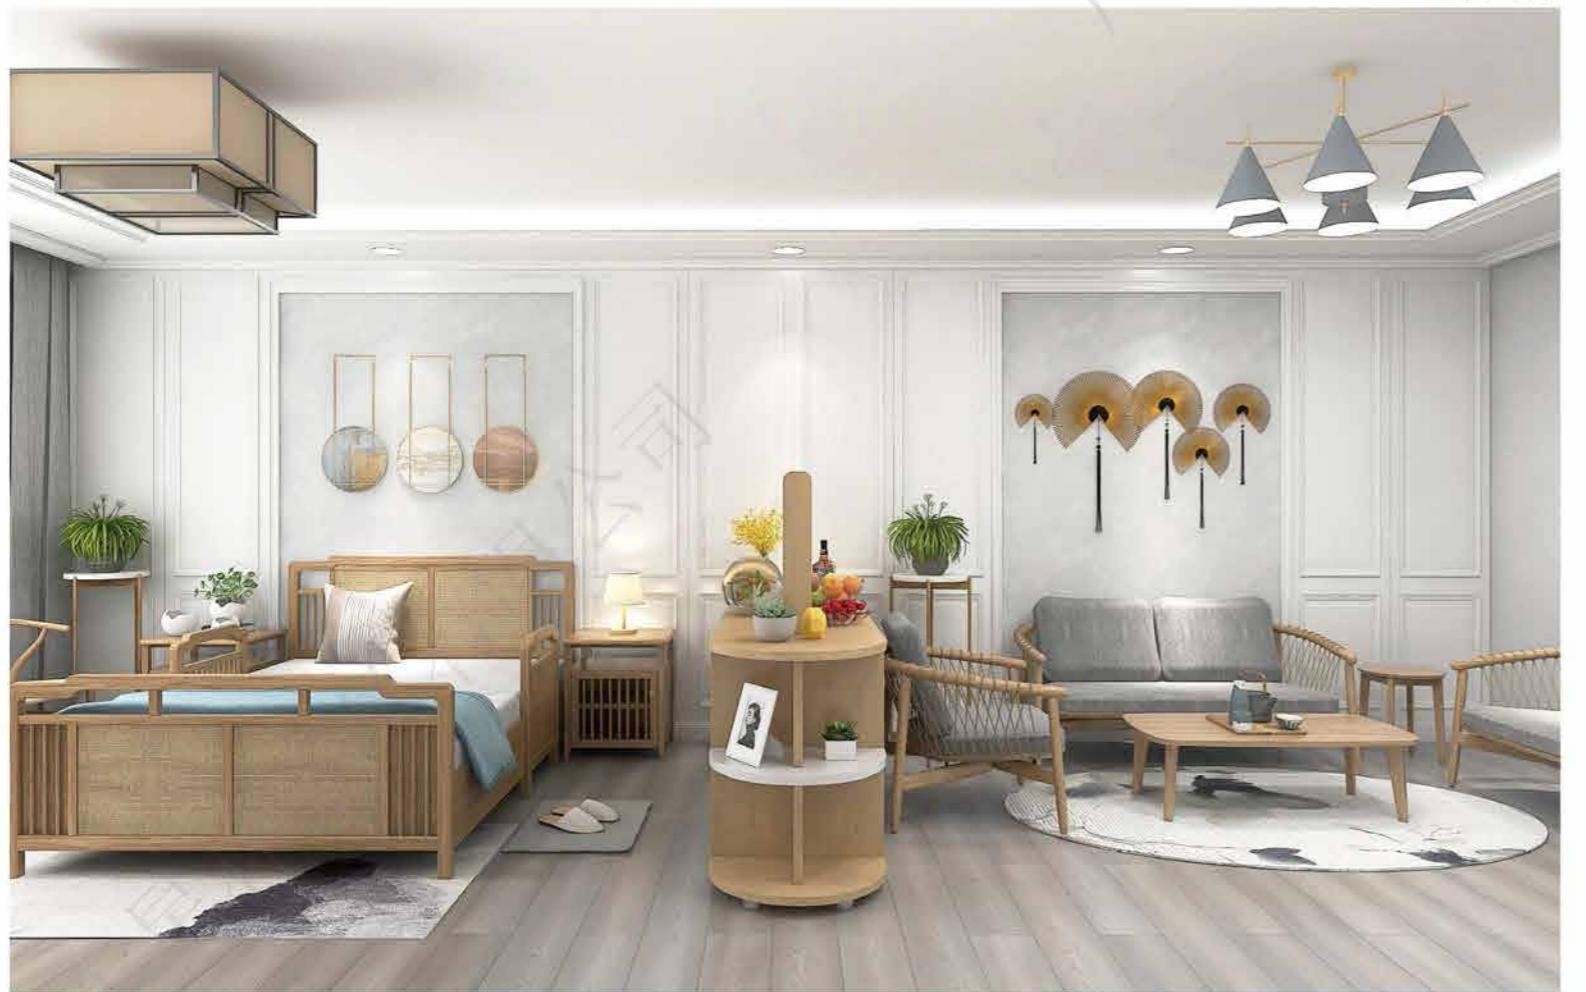

考虑到老年人的行为方式对家具稳固性和安全性的要求，如家具过轻可能会导致老人扶握和支撑家具时翻倒，太高或太矮都会让老人起坐困难等，此外家具的造型尽量避免尖锐形状以防止老人磕碰，从而保证老人使用时既安全又便利。

In the overall space planning, the furniture interior space and lines are scientifically planned and designed, and the functional areas are rationally planned to ensure the lighting and ventilation of each space; large-scale space is reserved to facilitate wheelchair access, so that the elderly can be accessible and move more conveniently and freely.

Considering the requirement of the old people's behavior on the stability and safety of furniture, such as too light furniture may cause the old people to overturn when holding and supporting furniture, too high or too short will make it difficult for the old people to sit up, etc. In addition, the shape of furniture should avoid sharp shapes to prevent the old people from bumping, so as to ensure that the old people use it safely. It's also convenient.

#### 单体图/SINGLE FIGURE

## CHINESE GARDEN/中式田园

中式田园——设计源于中国江南水乡建筑，结合中国乡村元素，给人以一种回到故乡的感觉。

本系列家具在很多细节元素方面采用中式乡村材质及设计元素，比如麻线编织、腰编纹、细木格栅等。

产品采用天然原木，虽是田园风格但在工艺细节方面非常讲究，家具的连接采用榫卯结构，结构稳固结实。

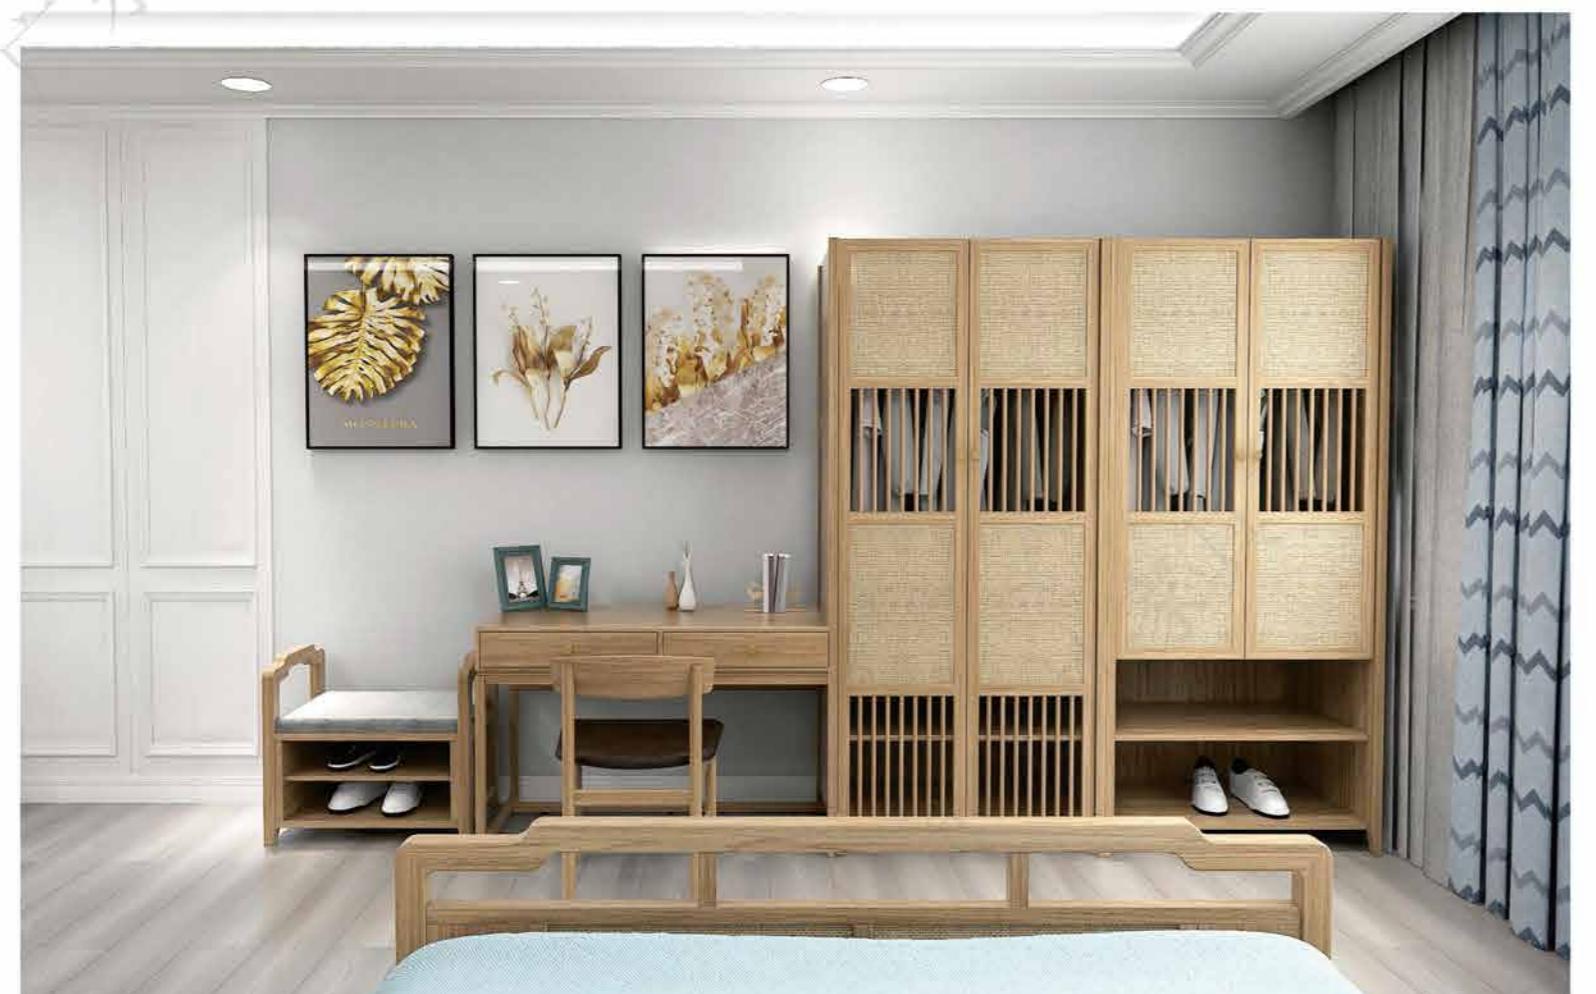

为了便于老人年使用，在家具转角处用圆角化处理，增加了多处扶手，利于老年人抓手支撑。

Chinese-style garden-The design originated from the water village buildings in the south of China, and combined with the incompetence of the Chinese countryside, it gives people a feeling of returning to their hometown.

This series of furniture adopts Chinese-style rustic materials and design elements in many details, such as twine weaving, teng weave, fine wood grille, etc.

The product is made of natural logs. Although it is rural style, it is very particular about the technical details. The connection of furniture adopts tenon-and-mortise structure, and the structure is stable and strong.

In order to facilitate the use of the elderly year by year, rounded-corners are used at

## NURSING HOME/护理之家

单体图 / SINGLE FIGURE

## LONGEVITY/延年益寿

延年益寿——延年益寿系列取“寿”符文细节雕刻装饰。在柜门用“寿”符文本雕拉手，在床尾采用“寿”字符文拼花工艺作。  
本系列家具符合老年人特点，“寿”字符文在中国古文化中就带有祝福的含义。同时在家具转角处都作了圆角化处理，增加了多处扶手，方便老年人抓手。  
产品采用天然木材制作，在很多细节方面用四分之一圆柱作为转角连接，其一可以避免尖锐的直角，同时在产品整体美观度方面也得到提高。  
Longevity: The Longevity series is carved and decorated with "Shou" rune details. Use the "Shou" rune wood carving handle on the cabinet door, and use the "Shou" character inscription at the end of the bed.  
This series of furniture is in line with the characteristics of the elderly. The "Shou" character text has a meaning of blessing in ancient Chinese culture. At the same time, the corners of the furniture have been rounded, and multiple handrails have been added to facilitate the elderly's grasp.  
The product is made of natural wood, and a quarter of the cylinder is used as the corner connection in many details. One of them can avoid sharp right angles and improve the overall aesthetics of the product.

## LONGEVITY/延年益寿

金色沙丘——像沙丘一样，曲线流动。  
本系列家具为了符合老年人生理特点，设计灵感来自沙丘，高低起伏，同时转角圆滑。同时天然木纹带有淡淡的金黄色，更加符合沙丘的设计概念。  
家具采用天然多层木制用，在边作半圆造形，同时在扶手方面进行雕刻挖孔，即保证了板材的整体性，同时又体现了适老家具应有的功能。  
本系列家具适用于专业的养老机构，外观简洁，产品整体性强。  
Golden dunes—like sand dunes, the curves flow.  
In order to meet the physiological characteristics of the elderly, the design of this series of furniture is inspired by sand dunes. At the same time, the natural wood grain with a touch of golden yellow is more in line with the design concept of sand dunes.  
The furniture is made of natural multi-layer wood, with semi-circular shapes on the sides, and engraving and digging on the armrests, which guarantees the integrity of the board and at the same time reflects the proper function of the old furniture.  
This series of furniture is suitable for professional elderly care institutions, with a simple appearance and strong product integrity.

## 单体图/SINGLE FIGURE

## SIMPLE LIFE/简约生活

## 休息床单体图/REST BED SINGLE FIGURE

适老化休息床同普通床相比有一些不同：  
首先在床边都含有扶手，床边扶手的作用是为了老年人起床方便。  
其次在床尾都含有抓手孔，老年人因为生理机能日益老化，行动不方便，很多时候走动都要扶着东西，床尾带有孔槽是为了老年人在走动时更好的抓手。  
最后适老化家具大部份都以浅为主，颜色接近天然原木。  
产品采用板式结构，板材为天然环保板材，易于安装运输，同时结构稳固。  
There are some differences between aging-friendly rest beds and ordinary beds:  
First of all, there are handrails on the bedside. The functions of the handrails on the bedside are for the elderly to get up easily.  
Secondly, there are hand grips at the end of the bed. Because of the aging physiological function of the elderly, it is not easy to move. Many people need to hold things when walking in the end, most of the suitable aging furniture is light, and the color is close to natural logs.  
The product adopts a plate structure, and the plate is a natural environment-friendly plate, which is easy to install and transport and has a stable structure.  
This series of furniture is suitable for professional elderly care institutions, with a simple

## 床头柜单体图/NIGHTSTAND SINGLE FIGURE

多功能床头柜：XLYL-JYCG08  
规格：600\*550\*1800

多功能床头柜：XLYL-JYGG07  
规格：800\*550\*1800

多功能床头柜：XLYL-JYGG06  
规格：500\*550\*1800

多功能床头柜：XLYL-JYGG05  
规格：500\*550\*1450

适老化床头柜同常用家具床头相比有以下几点不同：

一、床头柜更加多功能化，因为有些养老空间有限，无法每位老人都有一个衣柜，所以会把衣柜及相应的储物柜整合在一个床头柜中。同时床头柜也是老人常用物品存储处，由于老年人行动不便，可能在床上呆的时间较长，在床上看书看电视之类，所以这也相应的要求床头柜具备更多的功能满足需求。

二、床头柜的尺寸一般在650毫米左右，这个尺寸比床高，同时比书桌稍矮一些，这样利于老年人在床上可以方便的放取床头柜上的物品。

Compared with common furniture bedside, the suitable nightstand has the following differences:

First, the bedside table is more versatile, because some elderly care spaces are limited, and every elderly person cannot have a wardrobe, so the wardrobe and corresponding storage cabinets will be integrated into a bedside table. At the same time, the bedside table is also a common storage place for the elderly. Due to the inconvenience of the elderly, they may stay longer in the bed, read books and watch TV in the bed, etc. This accordingly requires the bedside table to have more functions to meet demand.

Second, the size of the bedside table is generally about 650 millimeters. This size is higher than the bed and at the same time slightly shorter than the desk. This will help the elderly to conveniently put the items on the bedside table in the bed.

接待咨询台——咨询服务是进入养老空间的前台，是空间的最重要的空间。好的前台空间是养老空间的关键，产品主要根据装饰配套来设计生产，产品多以原木颜色为主，主要以温馨为主，前台主要有以下几个功能，接待功能，咨询功能。

Reception desk—Consulting service is the front desk that enters the senior care space. It is the most important space in the space. Good front desk space is the key to the senior care space. The products are mainly designed and produced according to the decoration. The products are mainly based on the color of the logs. Mainly warm, the front desk mainly has the following functions, reception function, and consultation function.

手抖是老年人群体比较常见的问题。因手抖导致咖啡、茶、汤、粥等泼洒而污染家具，因此老年家具的配件具有防水性或拆洗功能就变得比其他家具更重要了。在餐厅桌椅、茶几、电视柜等家具选择方面，选择轻便而稳定的适老化家具，同时对家具阳角进行圆角处理，从而避免磕碰，保证老人安全。  
Hand tremor is a common problem among the elderly. Because the hand shaking causes the spilling of coffee, tea, soup, porridge and so on, which pollutes the furniture, the waterproof or disassembly function of the accessories of the old furniture becomes more important than other furniture. In the selection of dining room tables, chairs, tea tables, TV cabinets and other furniture, choose light and stable aging furniture, while the furniture corner processing, so as to avoid knocking, to ensure the safety of the elderly.

适老化家具

SUITABLE FOR  
AGING FURNITURE

适老家具开发者：

- ① 我们为您提供最完整的适老化家具系统；
- ② 我们为您提供最专业的适老化家具产品；
- ③ 我们为您提供最完善的适老化家具规划方案；
- ④ 我们首倡建立“老人人体工学”数据研究；  
我们一直在适老化家居领域努力向前进！

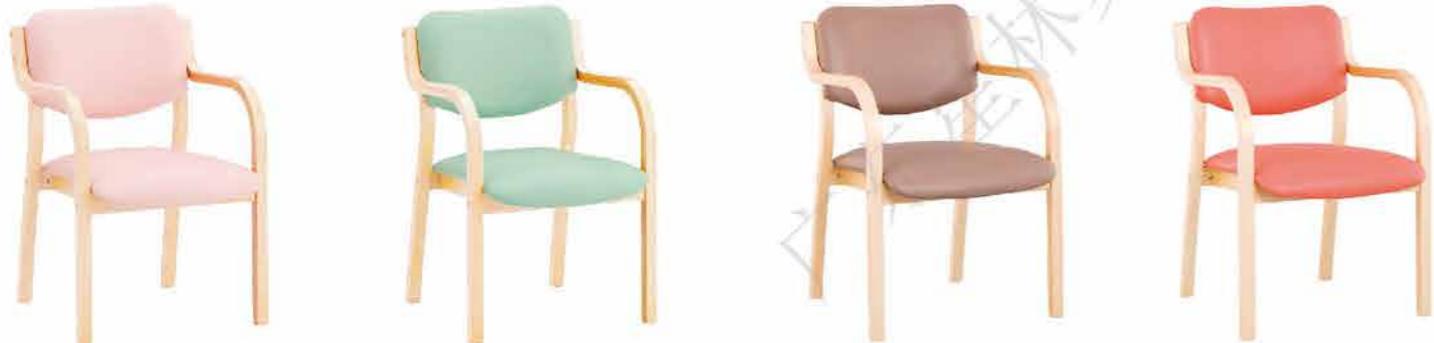

我们一直在思考.....

- ① 我们还能为适老化体系做些什么？
- ② 我们是否还可以做得更加细致专业？
- ③ 我们的企业社会责任可以承担更多的要求？

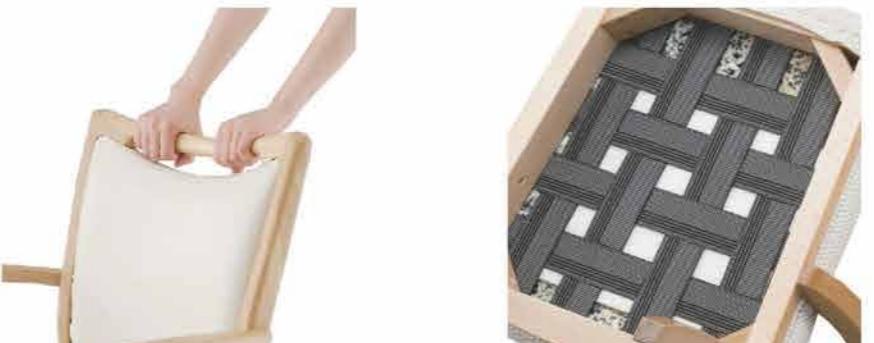

适老座椅：XLSL-Y01  
规格：530\*480\*830

座椅采用实木多层板制作，利用符合人体身体模具压制成型。座垫及靠背采用高弹性海绵，软硬适中符合中老年人。外观曲线圆滑无尖角。  
The seat is made of solid wood multi-layer board, which is pressed into shape using a mold conforming to the human body. The seat cushion and backrest are made of high-elastic sponge, which is moderately soft and hard, which is suitable for middle-aged and elderly people. The appearance curve is smooth without sharp corners.

适老座椅：XLSL-Y02  
规格：610\*600\*900

取天然原木，木榫结构，线条简洁，符合人体工程设计，转角圆滑，特别在扶手处设计利于老年人抓手。产品可以堆叠利用存储。座垫及靠背采用高弹性海绵软硬适中。  
Take natural logs, wooden tenon structure, simple lines, ergonomic design, smooth corners, especially in the armrest design for the elderly to grasp. Products can be stacked to take advantage of storage. Seat cushions and backrests are moderately soft and hard with a highly elastic sponge.

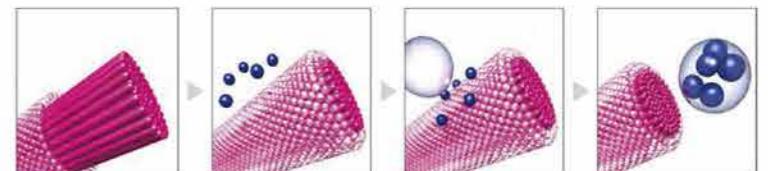

适老座椅: XSL-Y03  
规格: 530\*630\*780

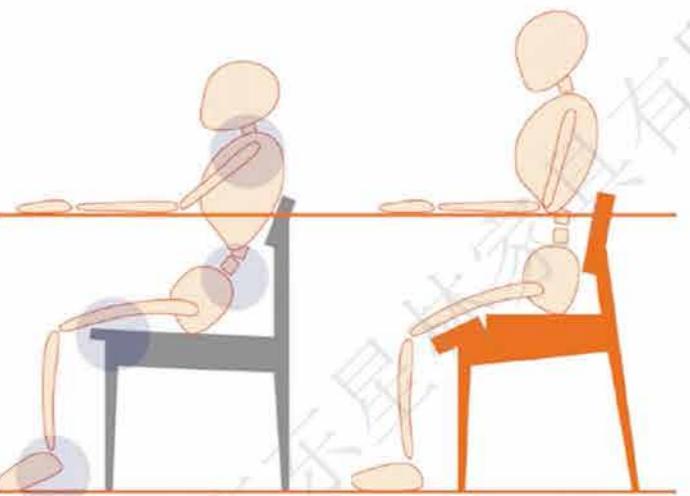

座椅采用实木多层板制作，利用符合人体身体模具压制成型。座垫及靠背采用高弹性海绵，软硬适中符合中老年人。外观曲线圆滑无尖角。可堆叠利于存储，靠背带扶手利于老年人抓手。

## XL-838 电动病床 (多功能称重)

XL-838 Multi-function electric weighting care bed

规格/Size : 2260x1060x500/800mm

## 功能 :

- 背部升降
- 腿部升降
- 整床升降
- 整床前后倾斜
- 称重功能
- 背部减压功能
- 一键式垂头仰卧功能
- UPS
- 电动CPR功能
- 手动CPR功能

## 标准配置 :

- 床头尾板1对
- 新欧长组合护栏4个
- 护栏控制器2个
- 电机4个
- 控制手柄1个
- 角度显示器4个
- 5寸中控轮4个
- 左右刹车脚踏2个
- 床体防撞轮4个
- 输液架插座4个
- 引流袋挂钩4个
- 助力棒插座2个

## 选配 :

- ※ 背部拍片功能
- ※ 可延伸床尾
- ※ 助力棒
- ※ 床面左右侧翻身功能
- ※ 整床左右倾斜功能

## Function:

- Back section up&down
- Knee section up&down
- The whole bed up&down
- Trendelenburg and reverse trendelenburg
- Scale function
- Back section decompression function
- One-Key trendelenburg function
- UPS
- One-Key CPR function
- Manual CPR function

## Standard device:

- 1Pair head and foot boards
- 4Pcs European style long bedside rails
- 2Pcs built-in bedside rail control
- 4Pcs actuators
- 1Pc handset
- 4Pcs angle display devices
- 4Pcs 5" central locking castors
- 2Pcs braking pedals on both sides
- 4Pcs bumpers
- 4Pcs IV drip holes
- 4Pcs drainage bag hooks
- 2Pcs lifting pole holes

## Option:

- ※ Back section X-ray filiming function
- ※ Extensible bed end
- ※ lifting pole
- ※ Roll-over function of left and right side of bed surface
- ※ Left and Right Inclination Function of the Whole Bed

※ 选配 Option:

**XL-501 电动病床 (五功能)**  
XL-501 Five function electric bed

规格/Size : 2260x1060x430/720mm

功能 :

- 背部升降
- 腿部升降
- 整床升降
- 整床前后倾斜
- 背部减压功能

选配 :

- ※ 背部拍片功能
- ※ Back section X-ray filming function
- ※ 手动CPR功能
- ※ Manual CPR function
- ※ UPS

Function:

- Back section up&down
- Knee section up&down
- The whole bed up&down
- Trendelenburg and reverse trendelenburg
- Back section decompression function

Option:

- ※ Back section X-ray filming function
- ※ Manual CPR function
- ※ UPS

标准配置 :

- 床头尾板1对
- 新欧长组合护栏4个
- 側护栏控制器2个
- 电机4个
- 控制手柄1个
- 角度显示器4个
- 5寸中控轮4个
- 左右刹车脚踏2个
- 输液架插座4个
- 引流袋挂钩4个

Standard device:

- Head and tail plate 1 pair
- 4Pcs European style long bedside rails
- 2Pcs built-in bedside rail control
- 4Pcs actuators
- 1Pc handset
- 4Pcs angle display devices
- 4Pcs 5" central locking castors
- 2Pcs braking pedals on both sides
- 4Pcs IV drip holes
- 4Pcs drainage bag hooks

\*选配 Option: X-Ray | CPR | UPS

规格/Size : 2150x980x450/740mm

功能 :

- 背部升降
- 腿部升降
- 整床升降

Function:

- Back section up&down
- Knee section up&down
- The whole bed up&down

标准配置 :

- 床头尾板1对
- 标准铝全金护栏1对
- 丝杆3条
- 5寸中控轮4个
- 中控制刹车踏1个
- 输液架插座4个
- 引流袋挂钩4个

Standard device:

- 1Pair head and foot boards
- 1Pair aluminum side rails
- 3Pcs lead screws
- 4Pcs 5" central locking castors
- 1Pc central lock brake pedal
- 4Pcs IV drip holes
- 4Pcs drainage bag hooks

**XL-301 手动病床 (三功能)**    **XL-301 Three function manual bed**

规格/Size : 2160x980x500mm

功能 :

- 背部升降
- 腿部升降

Function:

- Back section up&down
- Knee section up&down

标准配置 :

- 床头尾板1对
- 标准铝全金护栏1对
- 丝杆2条
- 5寸中控轮4个
- 中间刹车脚踏1个
- 输液架插座4个
- 引流袋挂钩4个
- 杂物架1个

Standard device:

- 1Pair head and foot boards
- 1Pair aluminum side rails
- 2Pcs Lead screws
- 4Pcs 5" central locking castors
- 1Pc pedal in the middle
- 4Pcs IV drip holes
- 4Pcs drainage bag hooks
- 1Pc shoe shelf

**XL-201 手动病床 (二功能)**    **XL-201 Two function manual bed**

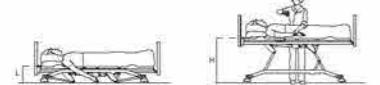

**User-friendly**

The Lago Care bed offers comfort for patient and nursing staff in every situation.

The bed offers a sleeping position at an The highest position of the bed is extra low height of x 25 cm, which cm. The patient can be examined and treated without straining your back considerably.

The reverse Trendelenburg position can be activated by means of the hand control. This position can only be used by key combinations or the hand-held selective locking system.

The backrest and knee rest are inclined simultaneously. A reverse Trendelenburg position is activated when a relax position is chosen on the Lago bed.

**Comfort for everyone**

The resident's ability to live independently at home or in nursing homes not only facilitates treatment by the nursing staff, it also offers dignified living conditions to the

## 多功能护理床

## 专为长期卧床人士设计

全方位照顾，不一样的舒适体验

## 更自在的舒适感

座椅升降多角度可调，更灵活的自由调整功能，怎么舒服怎么来

## 更科学的康复机制

可侧坐或支撑站立，协助病人松懈骨骼僵化以及轻运动

## 更体贴的心灵慰藉

该款护理床可让病人有独立感，无需外界帮助也能完成简单操作

## 更巧妙的医患交互

护理工作仅需一人即可完成，护理人员只需与病人交流

## 纯电动遥控，一键完成操作

德国护理床专家遥控接收技术，更灵敏更便捷

## 站立支撑，可协助使用者站立

安全稳固，给予病人强有力的身体支撑

养老浴缸

养老坐浴浴缸

# 设计

## Design

### 绿色设计 Green Design

绿色环保在当社会对于空间环境来说是首先关注的问题，如何做的绿色环保，我们从原材料上采用了天然木材，生产加工过程中采用的油漆及胶水都是符合EO级标准的。材料绿色只是一个环节，在产品制加工过程中，每道工序都严格按照国际绿色管理操作规范严格执行。

对于养老空间设计方面，我们从产品设计上保证绿色环保，在空间规划过程中，我们考虑通风、温度、湿度、采光等各种环境因素。

绿色设计不仅仅是环保，而是在养老空间中营造出健康舒适的生活休闲环境。

绿色设计是星林源为养老空间提供服务的首要考虑要点，对于绿色环保，我们始终如一，这不仅是企业态度，也是一种社会责任。

Green environmental protection is the first concern of the society for the space environment. How to make green environmental protection, we use natural wood from raw materials. The paint and glue used in the production and processing process are in line with EO Level standard. Material green is just a link. In the process of product manufacturing, each process is strictly implemented in accordance with international green management practices.

With regard to the design of senior care spaces, we ensure green and environmental protection in product design. In the space planning process, we consider various environmental factors such as ventilation, temperature, humidity, and lighting.

Green design is not only environmentally friendly, but also creates a healthy and comfortable living and leisure environment in the elderly space.

Green design is the first consideration for Xinglinyuan to provide services for the elderly space. For green environmental protection, we are consistent. This is not only a corporate attitude, but also a social responsibility.

人性化设计 Humanized Design

根据老人身高，重新定义厨房高度吧：市面上正常比较认可的普遍台面合适高度为「身高 $\pm 2+5\sim 10\text{cm}$ 」。假如台面低了容易增加弯腰时的负荷，台面高了一直站着烹饪容易产生肩膀疲劳的痛苦和感受。另外，能坐下来工作的厨房装修也是非常值得推荐的。若为高龄人士（腿脚不便需轮椅老人）则操作台根据使用者腿部情况高度 $+18\text{cm}$ =约73~85厘米左右。

床的高度不能太高或太低，以40~50cm为宜，便于老人上下床；若有使用轮椅的老人，床面高度则需要与轮椅坐面高度齐平。床垫床垫不易过软，以免老年人起身困难，另外可以在床边设置扶手，便于起身时借力。枕头“老年独寝，亦需长枕，则反侧不滞于一处。”《老老恒言·枕》夜尿壶·移动座便器 老人易夜间频尿，需要及时小便尿急去卫生间的路上避免发生失禁，夜起温度差异大，易引发心脏病。走廊偏远或黑暗容易磕碰或摔倒隐患 行动不便者不容易移步至卫生间需要介乎者，偶尔也可自理。

According to the height of the elderly, redefine the height of the kitchen. The suitable height of a common counter generally recognized in the market is "height =  $height \pm 2+5\sim 10\text{cm}$ ". If the countertop is low, it is easy to increase the load when bending down. If the countertop is high, cooking while standing will easily cause the pain and feeling of shoulder fatigue. In addition, the kitchen decoration that can sit and work is also highly recommended. If it is an elderly person legs and feet are inconvenient for the elderly, the height of the console according to the condition of the user's legs  $+18\text{cm}$  = about 73 to 85 cm.

The height of the bed should not be too high or too low, and 40~50cm is appropriate to facilitate the elderly to get in and out of bed. If there are elderly people using a wheelchair, the height of the bed needs to be flush with the height of the wheelchair. Mattresses Mattresses are not easy to be too soft, so as to prevent the elderly from getting up. In addition, armrests can be set up beside the bed to make it easier for them to use their strength. "Old people sleep alone, and long pillows are needed, but the opposite side is not at the same place." "Old and Old Words · Pillows" Night urinals · Mobile toilets The elderly are prone to frequent urination at night, and they need to urinate in a timely manner to avoid going to the bathroom. There is a large temperature difference at night when incontinence occurs, it is easy to cause heart disease, the corridor is remote or dark, and it is easy to bump or fall. People with reduced mobility are not easy to move to the bathroom, and occasionally they can take care of themselves.

### 环境管理 Environment management

## 圆角化设计 Rounded Design

在家具设计中，要避免直角出现在养老空间中作圆角处理，圆角细节处理在各各方面，比便作座的扶手、床尾、写字台的边角等等。老年人身体机能有些力不从心，一不小心就会滑跤。一旦身体碰到尖锐的角，很可能造成生命危险。

圆角化设计的大小根据养老空间中不同物品进行定义。主要根据材料的加工及物品大小、设计美学来综合考量。

In furniture design, we need to avoid rounded corners in the elderly space for rounded corners. Rounded corners are treated in all aspects, such as the armrest of a seat, the end of a bed, the corner of a writing desk, and so on. Elderly people are physically incapable of functioning. If they accidentally fall, they will fall. Once their bodies come into contact with sharp corners, their lives may be in danger.

The size of the rounded design is defined according to the different items in the pension space. It is mainly considered based on the processing of materials, the size of the articles, and the design aesthetics.

## 家具灵活性设计 Flexible design of furniture

由于老年人大部分时间都在室内，所以养老空间需要具备休闲、娱乐、餐饮、起居、康复、喝茶、会客等功能，但实际上养老空间不可能为某一种功能来定义一个单独的空间。那就必须是在同一空间中要起到多种功能的作用，这样就是要求空间中的家具具备一定的灵活性，比例可以方便移动，可以堆叠存放等。

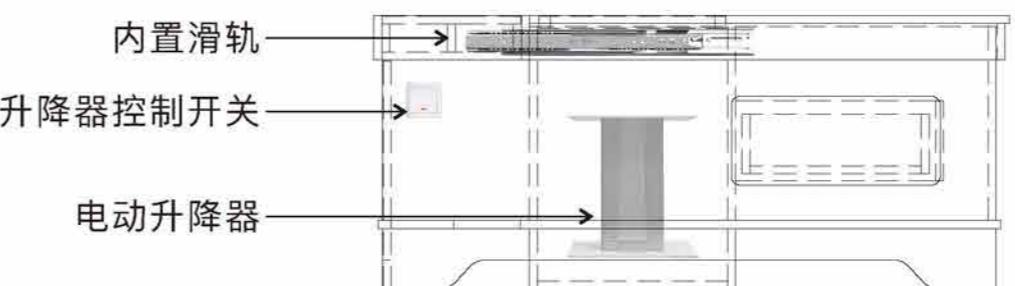

Because the elderly spend most of their time indoors, the elderly space needs to have functions such as leisure, entertainment, meals, living, rehabilitation, drinking tea, and guests. However, in fact, it is impossible to define a separate space for a function space. It must have multiple functions in the same space. This requires that the furniture in the space has a certain flexibility, the proportion can be moved, and can be stacked and stored.

## 智能化设计 Versatility Design

通过把一些功能集成一件家具上，比如茶台带有升降功能。不需要泡茶时可安放一些物品，需要泡茶时，可以将茶盘及电磁烧水设备升降到桌面上。

By integrating some functions into a piece of furniture, such as a tea table with a lifting function. You can place some items when you don't need to make tea. When you need to make tea, you can lift the tea tray and electromagnetic water boiling equipment to the table.
